TACC liquid dyes for cellulose acetate

bit.ly/TACCchart

TACC dyes allow to custom-color finished items by dipping, at room temperature. The process is particularly suitable for items for which color changes with fashion: spectacle frames, hair ornaments, fancy combs, buttons, buckles, tokens, etc...

MATERIAL:

Cellulose acetate, cellulose propionate, bioplastic derived from cellulose.

ADVANTAGES:

A wide range of colors.

Simple process that does not require special equipment.

Coloration of one or more pieces in one operation.

Safe coloration with skin contact.

INSTRUCTIONS FOR USE:

TACC liquid dyes are used diluted at **1 volume TACC + 2 volumes water** at **20°C**.

Prepare the dyeing bath. Let stabilize 5 to 10 minutes before use.

Dip the items to be dyed in the bath, from 30 seconds to 5 minutes depending on the required intensity.

Gently shake the pieces in the bath. Rinse with water.

RELATED PRODUCTS

DISCOLORANT :

Items can be partially bleached in a **8280 TACC discolorant** bath, pure or diluted, followed by rinsing with water.

DETERGENTS :

TP8002 detergent is a concentrated alkaline detergent that is effective in eliminating burn marks caused by laser engraving. It is used in an ultrasonic bath, at 10-100 ml / l, at a temperature of 30 ° C.

6170 and **6179 detergents** used by an ultrasonic cleaning to perfectly degrease items before dyeing.

DECORS REALISABLES :

TACC liquid dyes provide decorations in solid or gradient tones.

Multicolored effects or tortoiseshell imitation, can be achieved with **SCD viscous dyes** (technical bulletin 12 CO 26).

RD3 epoxy resins (technical instructions 13R06) make it possible to create decorations by inclusion.

FINITION :

Our large range of dry-polishing products (pegs, grinding, smoothing and polishing pastes, waxing emulsion...) are available of a perfect finish.

SHADES : A range of 30 standard colors is available and all miscible with each other for the realization of a variety of colors. **TACC liquid dyes** can also be delivered according to a reference chosen by the customer.

PACKAGING : Plastic jerrycan of 1, 5 and 10 liters.

STOCKAGE : 1 year in tightly closed original jerrycan. A bath can not be kept.
