

GAP dyeing pastes

for animal fibers

GAP dyeing pastes belong to the family of acid dyestuffs. They are used for the coloration by dipping of animal material : bone, horn, silk, wool, feathers...

Material

Wool, silk, feathers.
Bone, horn.
Galalith.
Polyamide.

Advantages

Easy to implement.
Fast solubility.
Good resistance to rubbing, perspiration, washing and light.
Allows to get a great uniformity.

Shades

A range of 16 standard colors is available.

Packaging

Plastic box of 1 kg.

Storage

1 year in tightly closed packaging under usual conditions of storage. Avoid from high temperature.

INSTRUCTIONS FOR USE

GAP dyeing pastes are dissolved in water at the rate of 0.5 g/l.

Dyeing time varies from 1 to 10 minutes at 70-100°C.

GAP dyeing pastes contains all essential ingredients to the preparation of the dyeing bath.

RELATED PRODUCTS

Fixing agent

The **4644 fixing agent** improves the resistance to washing and vapour press.

After dyeing, dip the items for 5 minutes in a bath at 60-80°C containing 2 g/l of **4644 fixing agent** and 5 g/l of **formic acid**.

Do not rinse, let dry.

Discolorant & whitener

1007 discolorant, used at 5-10 g/l at 80°C can bleach raw vegetable fibers or remove off non-compliant shades.

Cleaner

7520B cleaner is suitable for an efficient cleaning of utensils and containers.

Finishing products on buttons

70/30 polishing paste (technical bulletin 09PO22) and **BS3208 brightening paste** (technical bulletin 18PO23) provide a glossy finish by dry-barreling.
