

Our polishing bars are widely recognized by the profession (eyewear, watchmaking, jewellery) for their great flexibility and high performance. They have an excellent durability and allow a final mirror polished finish. They can be used on all precious metals and plastic materials. This range covers all the polishing steps: grinding, polishing, finishing and brightening.

COST REDUCTION	SIMPLIFIED CLEANING	HIGH PERFORMANCE
<p>Enhanced abrasive concentration, reduced consumption </p> <p>High speed of execution, reduces labor costs </p>	<p>Formulation allowing a clean polishing and enabling the cleaning of parts </p> <p>Dry product, simplified degreasing </p>	<p>High quality abrasives </p> <p>High performance components, mirror polished finish </p>
