

CD dyeing pastes for mother-of-pearl

CD dyeing pastes belong to the family of basic dyestuffs.

They are suitable for the coloration of mother-of-pearl material.

They also allow the achievement of bright shades on polyester.

Material

Mother-of-pearl.

Advantages

Bright shades.

Shades

A range of 16 standard colors is available. They are compatible with each other. Many shades can be achieved through mixing.

Packaging

Plastic box of 1 kg.

Storage

1 year in tightly closed original packaging in usual storage conditions. Avoid from high temperature.

INSTRUCTIONS FOR USE

CD dyeing pastes are used in solution in water at a concentration of **0.5 to 5 g/l**.

Heat up the dyeing bath to $70^{\circ}\text{C} \pm 10^{\circ}\text{C}$.

Dyeing time varies from a few minutes to several hours, according to the kind of mother-of-pearl.
